

Location: **National Physical Laboratories, New Delhi, India**

Year of Implementation: 2007

Product Summary:

Project	
Project	Fluid Control System For Calibration Of Flow Meters
Installation and Development	Is involved in the Interfacing of Data Acquisition Card and controlling of Flow, Temperature, and Pressure of Fluid in pipeline through Serial Port using Advantech ADAM 4000 series Modules. Also created mimics/GUI and HMI for all the control system for the actual visualization of the system.
Software & Language Used:	Labview 8.0 Professional Development System.
