* This chassis supports processors up to Intel Pentium 4 84W, Core 2 Duo, and Core 2 Quad 95W. For server grade CPU cards like the PCE-7214 configured with SAS RAID card and SAS HDD, we suggest utilizing the Xeon CPU at 35 watts or under for better thermal dissipation. This is due to the thermal and the power consumption of the SAS HDD being much higher than the SATA HDD while the system is operating.
