

Location: Universal Engg. Corporation, Saharanpur, Uttar Pradesh, India

Year Of Implementation: 2007

Product Summary:

Project	Compression Testing Machine for testing of Packing Material
Installation and Development	Is involved in the PC Based Interfacing of Data Acquisition Modules of Advantech (PCI Bus Based Multifunction card) and Measuring and Monitoring of various parameters of Compression Test Rig in different mode and plot graph between Compression v/s Displacement and also developed Report generation of its results etc. Also created calibration windows for all parameters. Created HMI for all the control system for the actual visualization.
Software & Language Used:	Labview 7.1 Professional Development System.
